|---|---|
| Release Version | 2.2.3 |
| Release Date | November 2, 2019 |
| Deliverables | ▪ Release Notes<br>▪ Bonzai Intranet Deployment Package |

# 2.  Summary of Issues Fixed

## 2.1  Issues Fixed in v2.2.3

Detailed below are the fixes in this release:

- Elements of the Employee Directory Web Part are now responsive, and display correctly in smaller screens and zones. This includes the Alphabet Links, which now wrap to the next lines for smaller zones and screen widths, and the results section, which now hides some columns for smaller screens and zones. (BOINT-8084)

- Fixed a misspelled label on the Employee Directory Web Part "Alphabet" label. (BOINT9409)

- Fixed an issue where the TypeAhead suggestions for the Employee Directory Web Part were overflowing outside the container when the web part is placed inside a small zone. (BOINT-9410)

- The images for the Event Rollup are now scaling uniformly, and are no longer distorted. (BOINT-8727)

- Important Messages can now be dismissed even if the User Profile storage property for dismissed messages is full. The oldest dismissed message ID is removed to make way for the new dismissed message ID. (BOINT-8650, BOINT-11354)

- Fixed an issue with the People Listing Web Part where it would fail to load contents when one or more persons to list are not found. (BOINT-9446)
- People Listing Web Part's grid view is now responsive, and will correctly stack at smaller widths and screen sizes. (BOINT-8768)

# 3. Known Issues

- Due to the caching introduced in version 2.2, users need to run a browser refresh (ctrl+f5) to obtain the latest cache for any changes to list views/settings used in web parts.

# 4. System Requirements

Required software is noted below, with an emphasis on the following terms:
- **Certified** - this release was tested specifically against this configuration.
- **Supported** - this release was not tested against this specific configuration, though it remains supported as differences between it and the certified software are minimal or not applicable to Bonzai.

|  | Certified | Supported |
|---|---|---|
| Operating System | Windows Server 2016 with .NET Framework 4.5 | Windows Server 2012 R2 with .NET Framework 4.5 |
| SharePoint | SharePoint 2016<br>SharePoint Online | SharePoint 2013 w/ SP 1 or higher |
| Database | MS SQL 2016 Std | Bonzai supports the versions of Microsoft SQL that SharePoint supports (SP2013 \| SP2016) |
| Web Browser | IE 11<br>Chrome 72.0.3626.121 |  |

# 5. How to Install or Upgrade to this Release

Please contact success@skyvera.com for more information on how we can help you to upgrade to this release.

The Bonzai team will deploy 2.2.3 to our CDN on November 2nd, and republish the themes for 2.2 customers.

**Customers running 2.2.0 and above will automatically be updated to 2.2.3 with no further action required.**
