Changes in this release

Enhancements

Bonzai Intranet 2.2.13 release has been certified with the Microsoft Edge browser.

Microsoft has recently announced the deprecation of Microsoft Internet Explorer 11 in favor of the new browser – Microsoft Edge. Microsoft Edge, which is based on the fast open-source Chromium engine, is the preferred browser for the Windows operating system.

We made sure that works on Microsoft Edge. Even more, our testing has indicated that Microsoft Edge is substantially faster than Microsoft Internet Explorer 11.

Deprecation notice

We are deprecating Microsoft Internet Explorer support in favor of the Microsoft Edge (Chromium-based). Although we recommend against it, you can continue to use Bonzai Intranet with Internet Explorer. However, in case of issues that are specific to Internet Explorer, the recommendation will be to use Microsoft Edge and bug resolution will be at our discretion.

Fixed issues

Here you can find the list of resolved issues specific to Bonzai Intranet 2.2.13.

Ticket	Description
BOINT-18120	Comments should be displayed on the news page.

Known Issues

The following is the known issue in Bonzai Intranet 2.2.13:

You may see new items in the Term Store even without a cache key update in Brick if you clear your browser's cache or use a browser where the stored cache key is different from the Brick cache key.

System requirements and supported platforms

The required software is noted below, with an emphasis on the following terms:

- **Certified** - this release was tested specifically against this configuration.

- **Supported** - this release was not tested against this specific configuration, though it remains supported as differences between it and the certified software are minimal or not applicable to Bonzai.

	Certified	Supported

SharePoint	<ul style="list-style-type: none"> • SharePoint 2016 • SharePoint Online 	<ul style="list-style-type: none"> • SharePoint 2013 with SP 1 or
Databases	<ul style="list-style-type: none"> • MS SQL 2016 Standard 	<ul style="list-style-type: none"> • Bonzai supports the versions of Microsoft SQL that SharePoint supports (SharePoint 2013 SharePoint Online)
Web browsers	<ul style="list-style-type: none"> • Google Chrome (latest version) • Microsoft Edge (latest version) 	

How to Install or Upgrade to This Release

The Bonzai team will deploy 2.2.13 to our **CDN (Content Delivery Network)** on April 3, 2021, and republish the themes for 2.2 customers.

Customers running 2.2.0 and above will automatically be updated to 2.2.13, with no further action required on their tenants/farms.

Please contact [Professional Services](#) for more information on how we can help you upgrade to this release.
